

EDUCATION EQUITY

Education is the key to economic and social opportunity—leading to increased prosperity for all.

All children deserve a quality education that will prepare them for college and career regardless of where they live, the color of their skin, their language or their immigration status. But too many California students from underserved communities are deprived of an equal opportunity to learn. We're fighting every day to right this wrong.

- **School Finance:** Fixing our broken system to ensure both adequate and equitable school funding
- **Teacher Quality:** Increasing access to qualified and effective teachers
- **College & Career Readiness:** Ensuring students receive a meaningful education that prepares them for civic engagement, social success and successful entry into the work force or higher education
- **Higher Education:** Improving student access to financial aid in public colleges and universities, and holding for-profit schools accountable
- **English Language Learners:** Making sure students learning English have a fair chance at meeting the same academic goals as those who are fluent in English

- **Accountability:** Improving state data and accountability systems so that they incentivize the provision of college and career ready opportunities and outcomes for all students
- **School-based Health:** Helping students thrive academically by promoting their physical and emotional well-being

CAMPAIGN FOR QUALITY EDUCATION v. CALIFORNIA

Our lawsuit on behalf of community organizations representing half a million California parents and students seeks to ensure that the State of California provides enough school funding for all students to obtain a quality education that prepares them for college, career and civic engagement. By failing to do so, the State violates their fundamental right to education guaranteed by the California Constitution.
